How refreshing

Editor, Daily News:

I just returned from a PSA/digital exam given by Specialists in Urology, a medical office in Naples.

The exam was completely complimentary, with no solicitations and no obligations.

Were it not for the generosity of this group of doctors many men would not catch this debilitating malady in its early stages when their chances for beating it are quite good. It is refreshing to see something positive in this era of extensive criticism of the medical profession.

A friend in need

Donn Pinkney/Naples
